

STUFFING BOXES

ADD-ON STUFFING BOX KITS

Add-on stuffing box kits are used when an application requires a stuffing box and the replacement control does not have one built-on. These add-on stuffing box kits are designed to fit all capillaries and will fit all sensing bulbs up to 3/8" in diameter. They are designed to convert a standard (non-stuffing box) control to fit a stuffing box application.

STUFFING BOX ADAPTORS

ORDERING DATA			
UNI-LINE ORDER NO.	FINISH	APPLICATION	PHOTO
4590-043	BRASS	These special fittings are designed to convert a 3/8" pipe stuffing box application to 1/4" pipe. This allows installation of a replacement control (that has a 1/4" pipe stuffing box fitting) into an application that was originally 3/8" pipe.	
4590-044	NICKEL		
4590-173	NICKEL	These special fittings are designed to convert a 1/4" pipe stuffing box application to 3/8" pipe. This allows installation of a replacement control (that has a 3/8" pipe stuffing box fitting) into an application that was originally 1/4" pipe.	

4650-003 TANK ADAPTOR KIT

The 4650-003 is designed to allow a serviceman to add stuffing box to an application which originally did not have a stuffing box.

4650-004 ADD-ON PANEL NUT ADAPTOR KIT

4650-004 Add-On Panel Nuts (nickel plated) are used when an application requires a panel nut and the replacement control does not have one built-in.
