

COMMERCIAL ELECTRIC LIMIT CONTROLS

5225 (LCH) MANUAL RESET LIMIT CONTROLS

The 5225 Series Manual Reset models have a reset button and feature SPST switch action. The reset button is a trip-free design, and the switch contact will reset only when the reset button is released after being depressed. Temperature must drop approximately 50°F before the switch contacts can be latched closed by depressing the reset button. U.L. file number E12103.
