

INFINITE SWITCHES

5500 INFINITE CONTROLS UNI-KITS®

5500 Infinite Uni-Kits include adaptors for screw or palnut type mounting. Kits include dial adaptors to allow the customer's dial to be used. Kits are available with white dials, black dials or no dial. See ordering chart for specific model number. All kits have a dial shaft with easy break-off grooves which can be taken off to match various shaft lengths. 120, 208 and 240 VAC models are available (see ordering chart).

ELECTRICAL RATING

15 amp at 120 VAC, 208 VAC and 240 VAC resistive load.

AMBIENT RATING

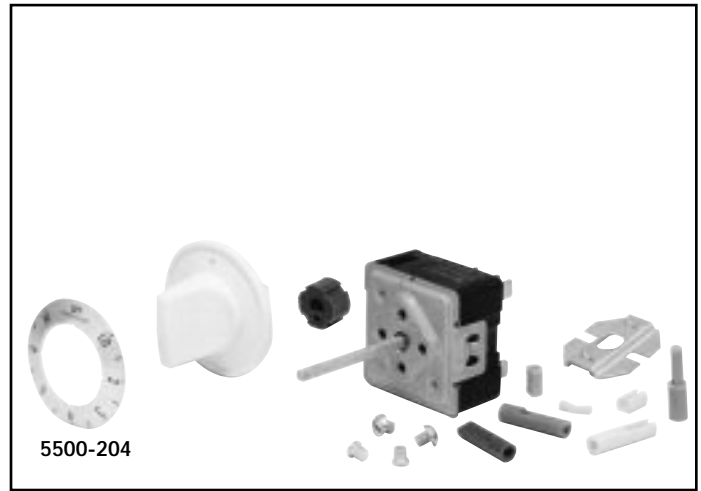

Not recommended to exceed 180°F.

CONTROL MECHANISM

3 indexing positions

High, Low, Off

Models are available with a low input of 5% or 22% and infinite inputs up to 100%

COMMERCIAL UNI-KITS®

The 5500 Series Commercial Infinite Control kit is the same as the standard infinite kit, except it has a heavy-duty dial shaft. This shaft is grooved at all the standard lengths and may be "broken off" to the required length.
