

THERMOPILES

1950-001

1951-001

1950 and 1951 Series

The Robertshaw® 1950 and 1951 Series Thermopiles lead the industry for gas appliance applications. Their primary function is to ensure a standing pilot light is operative so that on a call for heat, the main burner gas will be properly ignited. Thermopiles are placed in gas applications to detect the existence of a flame for safety purposes by shutting off the potential gas flow to a burner.

A thermopile is the assembly of many thermocouples to increase the millivolt output.

Robertshaw thermopiles have two types of connections: coaxial and two-wire spade connectors. The 1950 Series Thermopiles, also known as TP-75, are two-wire spade connectors. The 1951 Series Thermopiles, also known as CP-2 (250 to 750 millivolts), are coaxial connectors. The 1950 and 1951 Series Thermopiles (pilot generators) are designed for use on self-powered gas control systems. They can be used to replace similar competitive devices.

Features and Benefits

- Easy burner installation with attached threaded nut
- Stainless steel outer jacket for long life and resistance to heat blistering
- Combination of copper and nickel alloys for good electrical conductivity
- Mica washer to insulate from shorting conditions
- Tinnerman clip included
- Various lengths available for multiple applications

Specifications

Part Numbers	Description	"X" Length	Includes	Connection Type	Open Circuit Output
1950-001	Thermopile	36" (91cm)	PG9 Pilot Adaptor	Two Lead	250-750 mV
1950-002	Thermopile	48" (120cm)	PG9 Pilot Adaptor	Two Lead	250-750 mV
1950-532	Thermopile	36" (91cm)	NA	Two Lead	250-750 mV
1951-001	Thermopile	36" (91cm)	PG9 Pilot Adaptor	Coaxial	250-750 mV
1951-536	Thermopile	36" (91cm)	NA	Coaxial	250-750 mV
21424 (SA)	Unitrol® 110 Thermopile	914mm	NA	Two Lead	NA
