

Breathe cleaner, fresher air!

With the technology installed in over 100,000 applications worldwide, iWave is a complete line of bi-polar, high-output ion generators designed specifically for treating air in air conditioning systems. As the air flows past the iWave, positive and negative ions actively purify the supply air, killing mold, bacteria, and viruses in the coil and living space. The ionization process also reduces allergens, smoke, and static electricity, as well as controls odors (cooking, pet, VOCs) and other particles (no more sunbeams) in the air without creating ozone or any harmful byproducts. Easily installs between air filter and cooling coil to treat the indoor coil; as an alternative, the iWave can be installed in supply air. UL and cUL approved. Includes three-year limited warranty.* Visit iwaveair.com to learn more.
