EVAPORATOR BLOWER

The first production runs of Sunline II's were style "F" units. The difference in the style "F" units from the present style "E" units is the evaporator blower and limit.

When ordering a replacment blower for a style "F" unit, you can order the blower for a style "E", however, in some cases you must change the limit. For models SA18G080 to SA30G080, you must order two part numbers to convert a style "F" unit to a "E" unit (see table below). Part number 026-15227 is a blower wheel and 363-27776 is a housing.

	STYLE "E" UNITS			STYLE "F" UNITS
